

Getting the Comfort Talk® Message Out

The prestigious German publisher, Auer Verlag, just released the German edition of our successful English language book *Patient Sedation without Medication*. You can order *Sedieren ohne Medikamente* directly from the Auer Verlag. Check out free samples of our German, English, and Dutch editions of the book [HERE](#) on our website.

During my recent Europe trip, Matthias Ohler vom Carl-Auer Verlag in Heidelberg conducted an interview about our work with Comfort Talk® for their "Sounds of Science" series. You can listen to the podcast [HERE](#), if you speak German!

Spokane Inland Imaging

In June we trained the MRI department of Spokane Inland Imaging—a forward thinking, successful institution with practices all over Washington State.

After the challenges of the 2 ½ years of COVID it is even more important to help staff remain resilient. Coming home from work and knowing one made a positive difference in a patient's life and being acknowledged for it is the best recipe for enjoying work again. That is what Comfort Talk® is all about!

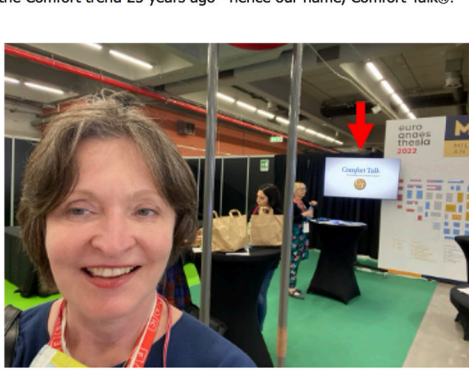

Alex Chisholm, PT, was my expert co-trainer.

Euroanaesthesia 2022

We were well represented at Euroanaesthesia 2022 (4-6 June) in Milan, Italy. Webedge TV broadcasted a short video about Comfort Talk® and what trainees and patients have to say about Comfort Talk®. See the video below or click [HERE](#).

The most amazing and rewarding message from Euroanaesthesia was that anesthesiologists are now urged to receive training in communication to ease patient pain and anxiety. The word "comfort" was heard very often. We are proud that we started the Comfort trend 25 years ago—hence our name, Comfort Talk®!

Comfort Talk® at Euroanaesthesia 2022

Association for Perioperative Practice Meeting

The trend continues, Dr. Lang will be addressing "Rapid nonpharmacologic management of pain and anxiety" at the Annual Meeting of the Association for Perioperative Practice at the University of York, UK, on 10 September 2022.

Who Uses Comfort Talk®?

Imaging Centers
Dental Practitioners
Surgical Centers
